Statistics for rail freight transport in May 2016

12.07.2016

Monthly statistics including data for May 2016 have been published.

The weight of transported cargo fell in May 2016 by 7%, which is the biggest decrease this year. Meanwhile, transport performance fell by 5,2% and operating performance by 4,4% which also constitute the most significant drops in 2016 so far. Market shares of small operators have been increasing steadily from the beginning of the year. Poor performance of freight transport was mainly due to decreased level of transport of coal and aggregates.

You will find data on freight transport [here](#).
